

EIR HYDRATION

NICOTINAMIDE ADENINE DINUCLEOTIDE (NAD⁺)

Anti Aging & Neurogenerative

When *NAD* is given intravenous, some research has shown it can improve:

- ✓ **Mental Clarity**
- ✓ **Alertness**
- ✓ **Concentration**
- ✓ **Memory**

OVERVIEW

NAD and *NAD⁺* occur naturally in the body. They play a major role in the chemical process of generating energy. *NAD⁺* is probably the most important co-factor for improving mitochondrial function. Mitochondria are intracellular organelles (a.k.a. "energy power houses") where micronutrients are converted to energy-rich ATP molecules for the cell. *NAD* helps the liver break down fats that are essential to provide energy for the body. Boosting *NAD⁺* may help manage a wide spectrum of diseases, ranging from diabetes to cancer.
